Greeting, 1906

SEDALIA, Mo., Jan. 1, 1906.

DEAR FRIENDS—At the beginning of a New Year, we are pleased to present you with our **NEW AND ENLARGED GARDEN, FARM AND POULTRY ANNUAL**, for 1906, describing **The Best Seeds and Bulbs Grown**, at right prices; also the most complete and largest stock of **BEE AND POULTRY SUPPLIES IN THE WEST**. We have just closed the most profitable year of our existence with a wonderfully large list of orders from both new and old customers which has prompted us to add many new and valuable seeds and supplies for 1906. We thank our friends for their kindness and liberal orders in the past, solicit your future patronage and ask you to kindly have your friends send their orders with yours this season for **ARCHIAS' "SURE SEEDS" and SUPPLIES**—a favor which we will appreciate. Heartily wishing you a prosperous New Year we are

Respectfully yours,

ARCHIAS' SEED STORE CORPORATION

Advantages We Offer:

Sedalia (Home of the Missouri State Fair) with a population of over twenty thousand, is situated in one of the finest farming sections of Missouri, with good shipping facilities, low freight and express rates.

We have railroads running in six directions, and more than twenty daily mails. **WE OWN THE FINEST AND BEST EQUIPPED STORE BUILDING** and warehouse in the West and have no rent to pay. Our cost for labor and advertising is about half that of houses in larger cities, therefore, we can sell the **best seed grown** lower than other houses in our line.

OUR SEEDS ARE SELECTED especially to meet the demand of Market Gardeners and Good Farmers, and are good enough for anyone, this having been our business for over twenty years.

OUR RESPONSIBILITY—We refer, by permission, to the Citizens' National Bank or to any Express or Railroad Office in Sedalia. Thousands trust orders with us each year. Your banker will tell you we are reliable.

FREE SEEDS—We will give away 100,000 packets free seeds to our customers this year as premiums. The larger the order the more free seeds you get. Have your neighbors order with you. It will pay you.

CASH PRIZES—On page 2 we give a list of prizes offered to our customers this season. We will sell you only **THE FINEST SEEDS GROWN** and want you to raise big crops and fine specimens. This pays you, and advertises us. We want every one of our customers to compete for these prizes in 1905. We will publish a list of winners of our prizes in our 1907 catalogue.

WE DOUBLE TEST all Seeds, both as to vitality and purity, and we can conscientiously recommend Archias' Northern Grown "Sure Seeds" as Money Growers and Mortgage Lifters.

Archias' Sure Heading Cabbage

Highest Quality, American Grown Seeds—None Better; Few Equal.

CULTURE—For early cabbage sow in hot beds during the latter part of February or the first of March. Transplant as soon as ground is ready. When plants are large enough, set in rows two feet apart, and

twenty inches apart in rows. Sow late varieties first of July. Ground should be deeply dug and well manured in the fall to insure best results in cabbage raising, and same preparation repeated early in spring.

Archias' All Head Early

ALL HEAD AND ALWAYS SURE TO HEAD.

This Cabbage is a Few Days Later Than Our Famous New Extra Early, but Twice the Size.

If a gardener or amateur were to plant but one variety of cabbage, he could get none that would answer all purposes as well as Archias' "Allhead." For uniformity, reliability of heading, size, earliness and quality it has no equal. It is also very profitable since the outer leaves are so few, a close planting can be made, and 1,000 more cabbages per acre can be grown than from seeds of other sorts. Pkt. 5c, oz. 20c, ¼ lb. 50c, ½ lb. 90c, 1 lb. \$1.75, postpaid.

Early Express—A very early sort, producing medium size heads, very sharply pointed. Oz. 15c, ¼ lb. 40c, 1 lb. \$1.50.

DAVIS' PERFECT CUCUMBER

Mr. Davis says: For several years I have been experimenting and trying to get a better strain of cucumber for forcing under glass as well as a good cucumber for growing out of doors, and after repeated failures I have at last succeeded in fixing a perfect type, combining quality, shape, color and productiveness.

Another strong point of merit is its splendid shipping qualities. It seems to hold its color and brittleness long after being cut.

On account of its being such a strong grower it is able to resist the cucumber disease which works destruction among so many of the best forcing varieties. It is as early as the earliest strain of White Spine and it out-yields by far anything I have ever tried. This new cucumber certainly has the fitting qualities to make it very popular when known.

Sold only in packets this season at 20c per pkt., 3 pkts. for 50c. Order early, as our stock is limited.

Archias' Evergreen Lawn Grass

Best Mixture for a Beautiful Evergreen Lawn—Is a mixture of such grasses as will withstand the heat and dry weather of our summers.

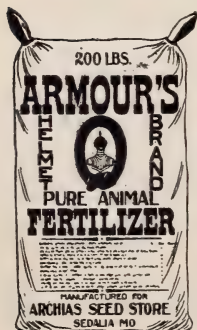

The seed we offer is as pure and reliable as can be found anywhere.

To Produce a Good Lawn—Plow or dig up the surface thoroughly to a depth of twelve to fourteen inches and mix the soil with well-rotted manure or our **Helmet Brand Lawn Fertilizer**, the latter being at all times preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 400 square feet. **It will add \$500 to the value of any farm** to have a nice lawn around the house. The most beautiful thing that can be placed about a home is a well-kept lawn. It is the soul of the surroundings of a home. BARRED PLYMOUTH ROCK—America's popular favorite. Splendid general purpose fowls, recommended strongly for prolific laying qualities and for market or table fowls. Our stock is first-class in every respect.

LUFF PLYMOUTH ROCK—A superior strain of the Plymouth Rock. Equally as prolific layers, and considered very desirable for market fowls, as they do not show dark pin feathers when dressed.

WHITE PLYMOUTH ROCK—These are very similar to the Barred Plymouth Rock, excepting in color which is pure white, and they are considered equally as valuable for general use, with the added advantage that they are better for dressing for market, as they do not show dark pin feathers when dressed.

SILVER LACED WYANDOTTES—There are no better than what we offer.

WHITE WYANDOTTES—Similar in all respects to the Silver Laced Wyandotte, except in color of plumage, which is pure white, and on this account it is more desirable for market fowls, as they do not show any dark pin feathers when dressed. Our stock is equal to the best in this country.

S. C. BROWN LEGHORN—The Leghorns as egg-producing fowl are better known than any other existing breeds. The young chicks reach maturity early, and commence laying at the age of five to six months. The strong recommendations of this breed are their non-sitting and prolific laying qualities.

S. C. WHITE LEHORN—Similar to Brown Leghorn, except that the plumage is pure white.

S. C. RHODE ISLAND REDS—This breed of fowls originated in Rhode Island, and is proving immensely popular wherever they are bred. They are most attractive in appearance, of desirable size and shape, prolific layers, and healthy, vigorous stock. Our stock is from the very best strains of this breed.

No. 10 Spray Pump with glass jar and two jets	85c

The "Auto-Spray"

We offer the "Auto-Spray" as the most generally useful of all spray apparatus. Briefly described, it has a capacity of four gallons and is made in two styles, galvanized steel and all brass. It works on the compressed air principle. Simply pour in the solution, lock pump in position and give the plunger a few strokes, and it is ready to spray a quarter acre of small crops without reloading. We also supply extension pipes for reaching tall trees. **It will do anything any other spray pump will do and do it better, and easier,** though for extensive orchards we have larger apparatus as shown in our general catalogue which we mail on request.

The "Auto-Spray" is also equipped with the "Auto-Pop" and "Anti-Choke" Nozzle when so ordered, which more than ever places the "Auto-Spray" beyond competition.

We recommend the "Auto-Spray" for its convenience, durability, efficiency and perfect agitation. We believe every user can save the cost of an "Auto-Spray" several times over in one season.

The "Auto-Pop" is an automatic "shut off" which doubles the efficiency of the "Auto-Spray" by **saving half the solution and labor.**

The "Anti-Choke" Nozzle construction is such that it is cleaned at every operation of the "Auto-Pop" and is the only nozzle made which **positively cannot clog.**
